

THE GODS APPROVE

Ω DIONERO CARBON

The Gods have spoken

It was time for yet another carbon fibre film. The difference from the previously versions is the colour and the pattern. Dionero is darker and the pattern is larger. Where the Elemento series matched perfectly with the real carbon of BMW and Ferrari, among others, Dionero matches the carbon of supercars. Bigger, coarser and perfect for large surfaces.

Omega-Skinz carbon better than other brands?

The unique mounting options are the deciding factor. Dionero is a high-quality cast PVC film and can simply be 3D deformed without unsightly overlaps and incisions. It processes just like ordinary wrapping film. Dionero comes with a hard protective layer that must be removed before applying it.

- High gloss with a smooth finish
- 3D formable
- Repositionable solvent adhesive
- Micro air channel technology

PROPERTIES (shortened; see the technical datasheet for full details)

Multilayered cast - repositionable adhesive with air channels (ICS™ system)

A high gloss 3D formable cast film with a woven carbon fibre pattern between the two PVC layers. The high gloss transparent coating creates a marvelous sense of depth when the film bends. The pattern remains very nicely intact when installed on convex and concave surfaces.

Omega-Skinz Dionero is extremely conformable and ideal for automotive as well as industrial and marine applications.

Product number:	OS-1978
Roll width:	152 cm.
Roll length:	20 m.
Stretchability:	190%*
Thickness:	100 micron
Adhesive:	OS-ICS-21 solvent with micro air channels
Structure:	Unique MLS™ system (consists of several layers)

* Read: stretches 90% beyond its original size.

EXTREMELY 3D FORMABLE
